SAMPLE SHEET CATALOG

SAMPLE SHEET CATALOG

NOT POSSIBLE? YET POSSIBLE!

Be it form/blanking, Cluster or Embossing tool, be it form tool, marking, wheel or Knock-out Tool. In the acquisition, the construction and the implementation of even very complex special tools, PASS Stanztechnik AG goes beyond the mere core functionality of punching tools. In this process, the expertise of the various departments of PASS will be bundled on a company-wide basis in order to find the ideal solution for the customer's special requirements.

Following strength calculations, all PASS special tools are submitted to a test run on one of our three machines assigned to this purpose. They are then labeled for documentation and control with a sample sheet. Furthermore, the customers receive from their personal contact person by PASS Stanztechnik AG, the precise setting data aligned with the machine to be fitted.

Innovation, know-how and highly modern machinery are, besides the professional and motivated team, the guarantee for the success of our products. PASS Stanztechnik AG makes every effort to achieve the optimum for its customers. Numerous patents in over 60 countries speak for themselves.
